**1.** The WiFi Box fits neatly into the space of a standard 24" X 24" ceiling tile, while offering easy installation of a number of wireless routers. The unit also offers a rotating center section for directing antennae, low friction hinges and a locking mechanism for security.

Part No. BS2-WF2424

**2.** The Tilt Panel Mount is designed for patch panels, network equipment and a variety of cable management tools. With 8 RMU, 18" depth and can open 90 degree access, the TPM-818 offers a wide variety of mounting options. Also offered is a compatible security cover kit, the top of which can also serve as an equipment shelf.

Part No. BS2-TPM-818

**3.** The Corner Camera Cover has a universal design which can protect virtually any corner-mounted camera. The unit mounts neatly and easily in any corner space and contains a large plexiglas front which allows the camera a wide range of motion.

Part No. BS2-CCC

**4.** The Under Counter Box can safely and securely house small rack-mounted or electrical equipment like DVD or digital recorders. In 3 RMU and 5 RMU sizes, it has a variety of mounting options to be easily attached or hung on nearly any surface.

Part No. BS2-UCB5

# security SOLUTIONS

**5.** The 10 RMU Ceiling Box offers a rack mounting solution that fits into a standard ceiling grid system. Four separate RMU sections, arranged in two tiers, can accept patch panels, networking equipment, and security devices.

Part No. BS2-CB10

**6.** The Mobile Work Station provides a safe and secure platform for physicians, technicians, professors and presenters. The MWS offers stability, a locking environment for laptops, CPUs and/or files and an Ergotech flat screen monitor mount, as well as easy access to cable management and a six-outlet power strip.

Part No. BS2-MWS
